

# LOGICAL CLOCKS

## WHO WE ARE

Logical Clocks AB is headquartered in Stockholm, Sweden, formed from members of the Distributed Computing Group at KTH – Royal Institute of Technology and RISE SICS AB. We are a growing startup, aiming to provide the market's go to full-stack Data Science platform.

## WHAT WE DO

We are bringing hyperscale Data Science to the Enterprise through the familiar lens of a Jupyter/TensorFlow/Conda environment, but with a backend data platform that includes the world's most scalable filesystem, scale-out compute and GPUs, and streaming analytics.

## WHY JOIN US

We are a growing startup where you can get hands on experience and apply your talents on many interesting and challenging problems related to Big Data, Data Science and AI.

You will join a multicultural team of awesome co-workers, work with the latest open source tech and be part of our mission to bring the full stack Data Science experience to the Enterprise.
