

LOGICAL CLOCKS

Front-end Developer

Application deadline: 2018-11-30

Description

Logical Clocks are the main developers of Hops, the world's fastest and most scalable Hadoop distribution, and Hopsworks, the Data Science platform for Hops.

We are looking for an experienced candidate to join our Hopsworks team and lead the UI development of this next-gen Data Science platform. We like to get our hands dirty with the latest Open Source technologies that can provide the smoothest and most engaging user experience in Hopsworks.

Responsibilities

- Design and conception of UI/UX wireframes
- Development of new user-facing features
- Optimize front-end applications for maximum speed and scalability
- Collaborate with other team members and stakeholders
- Other duties as required by a startup

Requirements

- BSc/Msc in Computer Science or equivalent work experience
- Strong expertise with JavaScript, AngularJs, HTML, CSS
- Experience in Angular, Bootstrap and RESTful services is a strong plus
- Experience in JavaScript build and test tools such as Grunt, Yarn, Jasmine
- CI/CD development
- Familiarity with other JavaScript frameworks such as React and is a plus
- Task-driven mindset with good communication skills in English

Benefits

- Fun and exciting startup environment with quick growth potential
- Employee stock-option plan
- Possibility for working remotely
- Gym reimbursement

WHO WE ARE

Logical Clocks AB is headquartered in Stockholm, Sweden, formed from members of the Distributed Computing Group at KTH – Royal Institute of Technology and RISE SICS AB. We are a growing startup, aiming to provide the market's go to full-stack Data Science platform.

WHAT WE DO

We are bringing hyperscale Data Science to the Enterprise through the familiar lens of a Jupyter/TensorFlow/Conda environment, but with a backend data platform that includes the world's most scalable filesystem, scale-out compute and GPUs, and streaming analytics.

WHY JOIN US

We are a growing startup where you can get hands on experience and apply your talents on many interesting and challenging problems related to Big Data, Data Science and AI.

You will join a multicultural team of awesome co-workers, work with the latest open source tech and be part of our mission to bring the full stack Data Science experience to the Enterprise.
